# **Professional Summary**

Passionate and detail-oriented Frontend Developer with expertise in React, JavaScript, and modern UI frameworks. With 2+ years of experience, I specialize in building responsive, user-friendly web applications that enhance user experiences. Skilled in state management, performance optimization, and component-based architecture, I thrive in collaborative, Agile environments, continuously improving my craft with the latest technologies.

## **Technical Skills**

### Frontend Development:

- Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript
- Frameworks/Libraries: React.js, Next.js, Tailwind CSS, Bootstrap, Material-UI
- State Management: Redux, Context API, Zustand
- Version Control: Git (GitHub, GitLab, Bitbucket)

- Testing: Jest, React Testing Library, Cypress
- Performance Optimization: Lazy Loading, Code Splitting, Memoization

### Tools & DevOps:

• Build Tools: Webpack, Vite, Babel

• CI/CD: GitHub Actions, Netlify, Vercel

• Cloud Platforms: Firebase, AWS S3, Heroku

• UI/UX: Figma, Adobe XD

#### Soft Skills:

- Strong problem-solving & debugging
- Team collaboration & communication
- Agile/Scrum methodologies
- Fast learner & adaptability

# **Work Experience**

### Frontend Developer

Freelance | 2023 - Present

- Designed and built responsive UI components using React, Tailwind CSS, and Next.js.
- Developed reusable React Hooks and Context API for efficient state management.
- Optimized performance using lazy loading, memoization, and efficient rendering techniques.
- Integrated third-party APIs (Stripe, Firebase) for authentication and payment functionalities.
- Collaborated with designers and backend developers to implement pixel-perfect UIs.

### Junior Frontend Developer

Startup Project | 2022 - 2023

- Assisted in developing modern React-based web applications with a focus on clean, maintainable code.
- Implemented mobile-first design, ensuring applications were fully responsive.
- Debugged and optimized UI performance, reducing load time by 30%.
- Worked in an Agile team, participating in sprint planning and code reviews.

## **Education**

Diploma in Computer Science & Engineering

Mymensingh Polytechnic Institute | Expected Graduation: 2025

Relevant Coursework: Web Development, Data Structures, Algorithms, Software Engineering

# **Projects**

Blood Donation Platform (Live: Netlify)

- Technologies: React, Tailwind CSS, Firebase
- Built a user-friendly donor search and request system with real-time updates.
- Integrated Firebase Authentication for secure user login and verification.
- Created responsive UI components to ensure accessibility on all devices.

#### **E-Commerce Website**

- Technologies: React.js, Redux, Stripe, Firebase
- Developed a fully functional e-commerce platform with product filtering, cart management, and checkout.
- Implemented Redux for efficient state management across the application.
- Integrated Stripe API for secure payment processing.

Portfolio Website (Live: GitHub)

- Technologies: React, Tailwind CSS, Framer Motion
- Built a personal portfolio showcasing projects, skills, and contact information.
- Implemented Framer Motion animations for a sleek UI experience.
- Hosted on Netlify with optimized SEO and performance tuning.
